

Complete Business Flow

Marketing to Operations Workflow Documentation

This document provides a structured overview of the complete customer journey and internal workflow, starting from lead generation and continuing through sales, design, production, payment verification, and final operations execution. The purpose of this document is to help teams clearly understand responsibilities, workflow dependencies, approval stages, and system transitions.

Document Version: 1.0

Prepared On: May 2026

1. Complete Business Workflow

Marketing → Telecalling → Sales → Interior Designer → CRB / Design Approval → Order Processing → Production → CRM → Accounts Verification → Operations

The workflow ensures that every customer order passes through structured verification, approval, production, and execution stages. Each department has defined responsibilities, status transitions, and approval checkpoints to maintain operational transparency and accountability.

2. Marketing

Generate and manage leads from campaigns, website inquiries, referrals, and events. Assign qualified leads to telecalling teams for further communication.

3. Telecalling

Contact customers, qualify requirements, schedule follow-ups, and convert interested leads to the sales department.

4. Sales

Conduct site visits, capture measurements, prepare quotations, negotiate with customers, and finalize project requirements.

5. Interior Designer

Prepare 3D designs, detailed quotations, revisions, and obtain customer approvals before final project submission.

6. CRB / Design Approval

Review designs, validate quotations, verify checklists, confirm payments, and approve projects for order creation.

7. Order Processing

Create orders, define production type (FM/HM), assign priorities, and transfer approved orders to production teams.

8. Production

Manufacture products, update stage progress, complete quality checks, and prepare orders for dispatch and operations.

9. CRM

Coordinate customer communication, manage payment follow-ups, and submit payment proofs for account verification.

10. Accounts

Verify payment proofs, approve or reject payments, and ensure financial compliance before operational execution.

11. Operations

Execute installation, track site activities, complete handover, and collect customer feedback and satisfaction.

2. Key Status Flow Overview

Module	Typical Status Flow
Marketing	new → contacted → qualified → unqualified
Telecalling	new → in_progress → contacted → qualified → converted
Sales	scheduled → visited → quotation_sent → closed_won
Interior	design_in_progress → submitted_for_approval → client_approved
CRB	pending → under_review → approved → order_created
Order Processing	new → processing → ready_for_production
Production	production_started → in_progress → quality_check → completed
CRM	pending_payment → payment_verified → transferred_to_operations
Operations	not_started → in_progress → completed

3. Roles & Responsibilities

Marketing Head: Lead generation and campaign management

Telecaller: Lead qualification and customer follow-ups

Sales Executive: Site visits and quotation management

Interior Designer: 3D design creation and revisions

CRB Member: Project approval and checklist validation

Order Processor: Order management and production coordination

Production Manager: Manufacturing and quality control

CRM Executive: Payment follow-up and customer communication

Accounts Team: Payment verification and financial approvals

Operations Team: Installation and project execution

4. Recommended Testing Flow

- 1 Create and assign a lead in the Marketing module.
- 2 Qualify the lead using the Telecalling workflow.
- 3 Convert the lead into a Sales opportunity.
- 4 Create quotations and conduct site visits.
- 5 Submit the project for Interior Design and CRB approval.
- 6 Generate an order and move it into Production.

- 7 Complete production stages and transfer to CRM.
- 8 Verify customer payment through Accounts.
- 9 Transfer the order to Operations for installation and handover.

5. Conclusion

The complete workflow is designed to create a transparent, trackable, and department-driven process for handling customer projects from initial inquiry to final execution. By following the defined stages, teams can ensure better accountability, improved communication, reduced operational delays, and enhanced customer satisfaction.
