

TEJAS KHAIRNAR

NODE.JS DEVELOPER | BACKEND ENGINEER (MERN STACK)

tejaskhairnar256@gmail.com | +91-7038672091 | <https://www.linkedin.com/in/tkhairnar7>

MERN Developer with **1+ year** of hands-on experience in **full-stack development, API design, authentication systems, and AWS deployment.**

Experience

UKValley Technologies : MERN Stack Developer | Nashik July 2025 – Present

- Engineered and maintained scalable **full-stack applications** using MERN stack.
- Designed and implemented secure **RESTful APIs** with **JWT authentication** and **role-based access control (RBAC)**.
- Collaborated with clients/stakeholders to understand requirements and deliver solutions.
- Created technical design documents and API flow structures for backend services.
- Optimized backend queries, improving **API response time** and overall performance.
- Deployed and managed **production applications** on **AWS EC2**.
- Worked in an Agile development environment with sprint planning, code reviews, and collaborative development.
- Independently handled backend modules and contributed to end-to-end feature delivery.

E-Web-Works: Full Stack Web Developer Intern | Hyderabad Dec 2024-May 2025

- Contributed to live **client projects** using **HTML, CSS, JS, PHP, MySQL**.
- Implemented **authentication, CRUD operations**, and **responsive UI**.
- Improved cross-browser **compatibility** and **performance**.

Technical Skills

Languages: JavaScript (ES6+) | HTML5 | CSS3

Backend : Node.js | Express.js | RESTful APIs | JWT Authentication | WebSocket

Frontend : React.js | Tailwind CSS | React Router

Databases : MongoDB | MySQL | PostgreSQL (Basic)

Payment & Other : Git, Version Control, Jira, GitHub, Postman, AWS EC2, Stripe, Razorpay, API Optimization

Projects

DryFruitShop (E-Commerce) Web App | <https://dryfruitbox.co.in/>

- Developed a secure, **mobile-responsive shopping platform** with **Google Authentication**, wishlist, cart, and checkout modules.
- Focused on **UI/UX design**, database connectivity, and **user session management**.
- Stack:** HTML, CSS, JavaScript, Bootstrap, PHP, SQL

Healcure – Healthcare Appointment & eCommerce Platform | <https://healcure.ca/>

- Built and deployed a healthcare platform with **React frontend** and **Node.js/Express backend**, featuring **MongoDB database, JWT authentication, Stripe payments, Calendly appointment scheduling**, and **AWS EC2 deployment**.
- Tech Stack:** React, Node.js, Express.js, MongoDB, AWS EC2, Stripe API, Calendly Integration, REST APIs, JWT Authentication

LetsChat (Real-time Chat Application) | Deploy soon...

- Built a **real-time messaging app** using **WebSocket, JWT Auth, React, Node.js**, and **MongoDB**
- Engineered a RESTful API and real-time communication layer** with Express, WebSocket, and jsonwebtoken, handled user registration, login, live user presence updates, and instant message delivery across multiple clients.
- Implemented secure and responsive frontend UI** using **Tailwind CSS**, React Router, and react-hot-toast, and integrated **form validation with Joi**, email verification via **Nodemailer**, and state management using **lodash** and **js-cookie**.

Education

Masters Of Computer Applications (MCA)

- R.C. Patel Institute of Management, Shirpur | 2023 – 2025*

Bachelor Of Management Studies- | Dhule

- M.D. Palesha College, Dhule | 2020 – 2023*

Certifications And Activities

C++ | Python | MySQL | Be10x (AI tools WorkShop) | Employability Readiness Skills – Infosys |
